

Keyburn Packaging Damage Guide

Document owner: Keyburn Logistics. Version 1.1, effective 1 September 2026.

Carriers sometimes deliver parcels with damaged packaging. Keyburn groups packaging damage into three grades, A, B and C. Find the picture that matches your parcel: each picture shows the grade and what to do.

What to do when your parcel arrives damaged

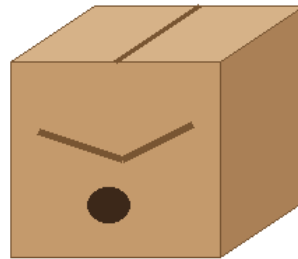

Grade A

Dented corner

Accept the parcel.
The contents are protected.

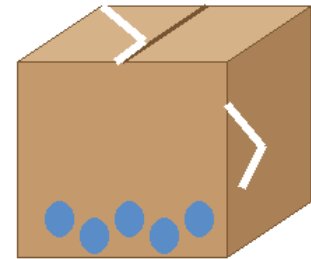

Grade B

Crushed side or puncture

Accept the parcel, open it
and check the item. If the item
is damaged, report it with a photo.

Grade C

Wet or torn open

Refuse the delivery.
The carrier returns it and
a replacement ships automatically.
